<sup>1</sup> Production reports to the Bureau of Internal Revenue are required by law and reports to the Agricultural Marketing Service are voluntary, but the latter are useful because they are broken down into special classifications.

Agricultural Marketing Service. Figures of the Service are from reports of manufacturers. Internal Revenue figures are from annual reports of the Commissioner of Internal Revenue.

<sup>1</sup> All oleomargarine "withdrawn for export" free of tax must be reported to the Bureau of Internal Revenue after having reached destination or the tax will be collected. Exports reported by the Bureau of Foreign and Domestic Commerce may cover various classifications of material.

<sup>2</sup> Figures are for quantity withdrawn for general use, tax paid (10 cents per pound on colored and ¼ cent on uncolored), plus withdrawn free from tax for use of the United States in prisons and other Federal institutions.

<sup>3</sup> Based on July 1 population.

<sup>1</sup> Includes edible tallow, beef fat, oleostearine oil, and whale oil.<sup>2</sup> Less than 300 pounds.<sup>3</sup> Includes cottonseed stearine, soybean stearine, vegetable stearine, and miscellaneous vegetable oil.<sup>4</sup> Includes ouricuri oil, palm flakes, palm stearine, rape oil, rice oil, and sunflower oil.

Bureau of Agricultural Economics. Annual totals on a calendar year basis (as in this table) are not published by the Bureau of Internal Revenue, but are computed by the Bureau of Agricultural Economics from the monthly data published in the semiannual cumulations of the Internal Revenue Bulletin. Totals for the year ended June 30 are published in the annual report of the Commissioner of Internal Revenue.

TABLE 263.—*Oleomargarine: Percentage contributed by important items to the weight of fats and oils (excluding milk) used in manufacture, 1925-41*

<sup>1</sup> Not reported prior to 1913. Includes small percentage of lard, 1913-21.<sup>2</sup> October-December only.<sup>3</sup> Net imports.<sup>4</sup> Preliminary.

Bureau of Agricultural Economics. Compiled as follows:

Production: 1912, 1914, 1916-18, from United States Department of Agriculture Supplement to Bulletin 769. 1919 estimated by Weber and Alsberg, The American Vegetable Shortening Industry. 1920 and 1921, United States Tariff Commission Report to Congress on Certain Vegetable Oils, Report No. 41, Second Series 1932, pp. 159-60. 1922-41 Bureau of the Census, Animal and Vegetable Fats and Oils.

Trade figures, 1912-17, imports from Imported Merchandise Entered for Consumption in the United States, quarterly; exports from December issues of Monthly Summary of Foreign Commerce of the United States. 1918-40 from Foreign Commerce and Navigation of the United States.

Stocks, from Bureau of the Census, Animal and Vegetable Fats and Oils.

Disappearance: Total, computed from data on production, trade, and stocks. Per capita, computed from total disappearance, using population as of July 1.

1 Preliminary.

2 Java and Madura only.

3 International Yearbook of Agricultural Statistics.

4 Year ended June 30.

5 Year beginning April.

6 Beginning April 1938 trade between Germany and Austria no longer reported as

foreign trade in the German statistics. The same applies to trade between Germany and

Sudetenland for the period October-December 1938.

7 4-year average.

8 Copra and similar raw materials.

9 April-December: full year not available.

10 January only, last published data.

11 January-March, last published data.

12 3-year average.

13 Not separately reported.

14 2-year average.

Bureau of Agricultural Economics. Compiled from official sources except as otherwise stated.

TABLE 270.—Oil cake and oil-cake meal: International trade, averages 1925-29 and 1930-34, annual 1938-40<sup>1</sup>

1 "Oil cake and oil-cake meal" includes the edible cake and meal remaining after making oil from such products as cottonseed, flaxseed, peanuts, corn, soybeans, etc., but soybean cake and meal, when separately reported, was not included in this table prior to 1937.

2 Preliminary. Yearbook of Agricultural Statistics.

3 January only, last published data.

4 January-July, last published data.

5 Not shown prior to June 1932; included in data for China.

6 3-year average.

7 Java and Madura only.

9 Beginning April 1938, trade between Germany and Austria no longer reported as foreign trade in the German statistics. The same applies to trade between Germany and Sudestenland for the period October-December 1938.

10 Year ended June 30.

11 January-March, last published data.

12 January-April, last published data.

13 April-December, full year not available.

Bureau of Agricultural Economics. Compiled from official sources except as otherwise stated.

<sup>1</sup> Preliminary.<sup>2</sup> Average for 9 months.<sup>3</sup> Reported in tubs prior to July 1940.<sup>4</sup> Average for 11 months.<sup>5</sup> Average for 10 months.<sup>6</sup> 3-cent processing tax added to price as originally quoted.<sup>7</sup> Prior to March 21, 1941, quoted in bulk shipments.<sup>8</sup> Average for 8 months.<sup>9</sup> Average for 7 months.<sup>10</sup> Dollars per barrel.

Bureau of Agricultural Economics. Compiled from Oil, Paint and Drug Reporter, The National Provisioner, and reports of the Agricultural Marketing Service, and Bureau of Labor Statistics. Prices include excise taxes and duties where applicable.

## Footnotes for table 275 (continued)

Bureau of Agricultural Economics. Compiled as follows:

## Production—

Butter, Bureau of Agricultural Economics.

Lard, Bureau of Animal Industry and Bureau of Agricultural Economics.

Marine animal oils, reports of the Fish and Wildlife Service. Reported in gallons; converted to pounds using 7.74 pounds per gallon for Atlantic and Gulf coasts and 7.5 for Pacific coast.

Tung oil, Bureau of Foreign and Domestic Commerce.

All other fats and oils, factory production, Bureau of the Census.

Trade figures, Foreign Commerce and Navigation of the United States.

Stocks, Bureau of the Census, except for butter and lard, which are from Cold Storage Report, Agricultural Marketing Service. Figures represent crude oil plus refined oil converted to crude basis, dividing by the following factors: Babassu, corn, cottonseed, palm-kernel, and palm oils, 0.93; coconut, peanut, and soybean oils, 0.94.

Apparent disappearance computed from data on production, trade, and stocks. Stocks carried over from preceding year (on Jan. 1) are not shown in this table.

TABLE 277.—*Fats, oils, and rosin used in the manufacture of soap, United States, 1934-41*

<sup>1</sup> Preliminary.<sup>2</sup> Includes whale, herring, sardine, menhaden and other fish oils.<sup>3</sup> Estimated.<sup>4</sup> Reported as "other vegetable oils."<sup>5</sup> The rosin season extends from April of one year through March of the next year. Data, however, are placed in calendar year in which most of the season occurs, i. e., 1941-42 data are placed in calendar year 1941.

Bureau of Agricultural Economics. Compiled as follows: Fats and oils, Bureau of the Census, Animal and Vegetable Fats and Oils; rosin, Naval Stores Research Division, U. S. Department of Agriculture; data for earlier years in Agricultural Statistics, 1941, table 512.

<sup>1</sup> Includes the following quantities unharvested on account of market conditions and/or not utilized due to excessive cullage (1,000 bushels): Total production, 1924—300; 1925—7,388; 1931—2,100; 1932—4,220; 1933—6,800; 1934—50; 1935—4,000; 1937—12,526; 1938—4,985; commercial production, 1938—4,638; 1939—11,982; 1940—3,255; 1941—300. Price and value apply only to the harvested portion of the crop.

<sup>2</sup> Estimates of the commercial crop refer to the production of apples in the commercial apple areas of each State and include fruit produced for sale to commercial processors, as well as for sale for fresh consumption.

<sup>3</sup> Compiled from Monthly Summary of Foreign Commerce of the United States, June issues, 1919-26; January and June issues, 1927-40; and official records of the Bureau of Foreign and Domestic Commerce.

<sup>4</sup> Dried and canned are converted to terms of fresh apples on following basis: 1 pound of dried is equivalent to about 7 pounds fresh; 1 pound of canned is equivalent to about 2 pounds fresh; 48 pounds fresh equal 1 bushel. No reexports reported.

<sup>5</sup> Total exports (domestic plus foreign) minus imports. Beginning 1933 domestic exports minus imports for consumption.

<sup>6</sup> Excludes apple waste.

<sup>7</sup> Beginning January 1933, includes apple waste, not separately reported prior to this date.

<sup>8</sup> Beginning 1933-34, imports for consumption.

<sup>9</sup> Preliminary.

<sup>10</sup> December indication of total shipments from 1941 crop.

Agricultural Marketing Service and Bureau of Agricultural Economics. Italic figures are census returns. Production of dried apples as reported by Giannini Foundation, Berkeley, Calif. Production of canned apples as reported by trade sources. 1 case 6/10's of canned apples weighs 36 pounds; 1 case 24/2's of canned apple sauce, 30 pounds.

TABLE 279.—*Apples, commercial crop: <sup>1</sup> Production (average 1934-39), and season average price per bushel received by farmers, by States, annual 1940 and 1941*

<sup>1</sup> Estimates of the commercial crop refer to the production of apples in the commercial apple areas of each State and include fruit produced for sale to commercial processors as well as for sale for fresh consumption.

<sup>2</sup> For some States in certain years, production includes some quantities unharvested on account of market conditions. In 1940 and 1941 estimates of such quantities were as follows (1,000 bushels): 1940—North Carolina, 58; Nebraska, 14; Montana, 43; Idaho, 200; Colorado, 69; New Mexico, 35; Utah, 19; Washington, 549; Oregon, 98; California, 600; 1941—California, 300. Prices apply only to the harvested portion of the crop.

<sup>3</sup> Preliminary.

<sup>4</sup> Includes the following quantities harvested but not utilized due to excessive cullage (1,000 bushels): Idaho, 216; Colorado, 50; Utah, 24; Washington, 1,280.

Agricultural Marketing Service.

TABLE 280.—*Apples: Production in specified countries, averages 1926-27 to 1930-31, and 1931-32 to 1935-36, annual 1936-37 to 1941-42*

<sup>1</sup> Preliminary. <sup>2</sup> 2-year average. <sup>3</sup> 4-year average. <sup>4</sup> Dessert apples. <sup>5</sup> Cider apples. <sup>6</sup> 3-year average. <sup>7</sup> 1-year only.

Office of Foreign Agricultural Relations. Compiled from official and consular sources except where otherwise noted. Marketing year beginning July 1. The year 1936-37, for example, refers to the crop harvested in the fall of 1936 in Northern Hemisphere countries and in the spring of 1937 in the Southern Hemisphere countries. Data for most countries are estimates of commercial production.

TABLE 281.—*Apples: Carlot shipments, by principal regions and by months during crop movement season, average 1930-39, annual 1931-41*

<sup>1</sup> Includes shipments in May as follows: 1935, eastern 1 car; 1934, western 3 cars; 1938, eastern 2 cars.<sup>2</sup> Beginning January 1942, figures are preliminary.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales but are useful principally in indicating the time of movement and the relative movement by months. A western carload averages about 756 boxes and an eastern carload about 525 bushel baskets; therefore a western car contains approximately 44 percent more apples than an eastern car.

Western region includes Montana, Wyoming, Colorado, New Mexico and all States west of these; all other States are called eastern.

<sup>1</sup> Less than 10 quotations.<sup>2</sup> Average of range of all eastern States, beginning January 1940.<sup>3</sup> Includes Northwestern Greening through December 1938.

Bureau of Agricultural Economics. Compiled from reports of Agricultural Marketing Service received daily through their market-news representative at New York.

Average prices as shown are based on stock of good merchantable quality and condition, 2½ inches minimum, in less than carlot quantities; they are simple averages of daily range of selling prices. Average for season is simple average of monthly averages.

<sup>1</sup> Foreign weights are converted to bushels on the basis of 48 pounds per bushel; domestic, 1 barrel equals 3 boxes (or bushels).

<sup>2</sup> Preliminary.

<sup>3</sup> January-April, last published data.

<sup>4</sup> Includes pears.

<sup>5</sup> Year ended June 30.

<sup>6</sup> 4-year average.

<sup>7</sup> Includes pears and quinces.

<sup>8</sup> International Yearbook of Agricultural Statistics.

<sup>9</sup> 3-year average.

<sup>10</sup> Beginning April 1938, trade between Germany and Austria no longer reported as foreign trade in the German statistics. The same applies to trade between Germany and Sudetenland for the period October-December.

<sup>11</sup> January-July, last published data.

Bureau of Agricultural Economics. Compiled from official sources except as otherwise stated.

TABLE 287.—*Apricots: Production, season average price per ton received by farmers, and value, California and Washington; quantity dried in California and quantities canned in Western States, and United States exports, 1919-41*<sup>1</sup>

<sup>1</sup> Among the 12 States reported in the 1930 census as producing apricots, California had almost 93 percent of the production.

<sup>2</sup> Includes the following quantities unharvested on account of market conditions (tons): California, 1930-8,300; 1931-4,000; 1932-13,000; 1939-8,000; Washington, 1934-200; 1935-700; 1938-2,300; 1940-600. Price and value apply only to the harvested portion of the crop.

<sup>3</sup> California pack, 1921-32; total Western States pack, 1933 to date.

<sup>4</sup> Net processed weight.

<sup>5</sup> Dried apricots are 12½ percent of total dried fruit for salad.

<sup>6</sup> Exports of dried fruit converted to unprocessed dry weight by dividing by 1.07.

Unprocessed dry weight converted to terms of fresh fruit on the basis of 5.5 tons fresh to 1 ton dried. Canned converted to fresh at ratio of 55 cases (45 pounds each) packed from 1 ton of fresh fruit through 1938; beginning 1939 at ratio of 60 cases to 1 ton, Jan. 1 to June 30; not segregated prior to that time.

<sup>8</sup> Preliminary.

Agricultural Marketing Service and Bureau of Agricultural Economics. Figures relating to production of dried and canned apricots compiled from trade reports. Exports compiled from records of Department of Commerce.

<sup>1</sup> For some States in certain years, production includes some quantities unharvested on account of market conditions. In 1940, estimates of such quantities were as follows (tons): Washington sweet, 700; sour, 1,100; Oregon sour, 270. Prices apply only to the harvested portion of the crop.

<sup>2</sup> Preliminary.

<sup>3</sup> Includes 700 tons of harvested sour cherries not utilized due to excessive cullage.

<sup>4</sup> Equivalent per unit returns for bulk fruit at the first delivery point.

Agricultural Marketing Service.

<sup>1</sup> Relates to the crop from the bloom of the year shown. In California the picking season usually extends from about Oct. 1 to Dec. 31 of the following year. In other States the season begins about Sept. 1. Estimates of production include fruit consumed on farms, sold locally, and used for manufacturing purposes, as well as that shipped. Fruit ripened on the trees but destroyed by freezing or storms prior to picking is not included. Production also includes the following quantities donated to charity, unharvested, and/or eliminated on account of market conditions (1,000 boxes): Oranges—1933, 977; 1934, 1,395; 1935, 614; 1936, 1,023; 1937, 1,204; 1938, 2,949; 1939, 1,236; 1940, 1,283; grapefruit—1933, 25; 1934, 181; 1935, 34; 1936, 100; 1937, 30; 1938, 3,774; 1939, 346; 1940, 4; lemons—1940, 420.

<sup>2</sup> Price and value apply to the entire crop exclusive of that portion donated to charity, unharvested, and/or eliminated on account of market conditions. Prices are equivalent per unit packing-house-door returns for all methods of sale. Prices are State averages, weighted by production to obtain United States average, rather than by sales, as in tables 294, 297, and 299.

<sup>3</sup> Imports converted to boxes on the following basis: Oranges, 90 pounds per box; grapefruit, 80 pounds per box; lemons, 76 pounds per box; limes, 80 pounds per box.

<sup>4</sup> 11 months, November to September.

<sup>5</sup> As estimated from prospects on July 1, 1942. 1941 prices are preliminary to July 30.

Agricultural Marketing Service and Bureau of Agricultural Economics.

<sup>1</sup> Includes satsumas and tangerines.<sup>2</sup> Preliminary.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales but are useful principally in indicating the time of movement and the relative movement by months. A carload averages about 400 boxes.

TABLE 293.—*Citrus fruits: Production (average 1930-39) and season average returns per box to growers, by States, annual 1937-41*

<sup>1</sup> Relates to the crop from the bloom of the year shown. In California the picking season usually extends from about Oct. 1 to Dec. 31 of the following year. In other States the season begins about Sept. 1. Estimates of production include fruit consumed on farms, sold locally, and used for manufacturing purposes, as well as that shipped. Fruit ripened on the trees but destroyed by freezing or storms prior to picking is not included. For some States, in certain years, production also includes some quantities donated to charity, unharvested and/or eliminated on account of market conditions. In 1939 and 1940, estimates of such quantities were as follows (1,000 boxes): 1939—oranges—California, Valencias, 822; navels and miscellaneous, 414; grapefruit—Arizona, 340; California Desert Valleys, 1; other, 5; 1940—oranges—California, Valencias, 540; navels and miscellaneous, 743; grapefruit—California Desert Valleys, 2; other, 2; lemons—California, 420.

<sup>2</sup> As estimated from prospects on July 1, 1942. 1941 prices are preliminary to July 30.

<sup>3</sup> Equivalent per unit packing-house-door returns for all methods of sale. Prices apply to the entire crop, exclusive of that portion donated to charity, unharvested, and/or eliminated on account of market conditions.

<sup>4</sup> Short-time average.

<sup>5</sup> Crop failure reported.

<sup>6</sup> Net content of boxes varies. In California and Arizona the approximate average for oranges is 70 pounds net and grapefruit 60 pounds; in Florida and other States, oranges 90 pounds and grapefruit 80 pounds; California lemons, about 76 pounds net.

Agricultural Marketing Service.

<sup>1</sup> Data segregated by States not available.<sup>2</sup> Reports of Department of Commerce; exports not segregated prior to Jan. 1, 1931. ✓<sup>3</sup> Actual quantities reduced to equivalent cases of 24 No. 2 cans weighing about 30 pounds per case of grapefruit hearts or 27 pounds per case of juice. A gallon of juice weighs about 8 pounds.<sup>4</sup> Data not available.<sup>5</sup> Reported as "fruit juice," probably mostly grapefruit juice.

Bureau of Agricultural Economics.

1 box of fresh fruit is estimated to pack slightly more than a case of canned fruit. Figures on Florida pack were obtained as follows: 1921-27, averages of various trade estimates; 1928, estimated by the Florida Grapefruit Canners Association; 1929 to date, complete surveys made by the Bureau of Foreign and Domestic Commerce, Department of Commerce. Figures on the pack in other States obtained from National Canners Association and trade sources.

## Footnotes for table 295

<sup>1</sup> Average is for months shown.<sup>2</sup> Includes 2-bushel Bruce boxes converted to basis of standard boxes.<sup>3</sup> Includes an average in August 1938 of \$2.97.<sup>4</sup> Includes an average in September 1933 of \$2.<sup>5</sup> Includes an average in August 1934 of \$3.23.

Bureau of Agricultural Economics.

Compiled as follows: Chicago, Chicago Fruit and Vegetable Reporter; New York, reports of California Fruit Growers Exchange. Prices weighted by number of boxes sold. These prices are a new series and are not comparable with those published in Yearbooks prior to 1930.

<sup>1</sup> Average is for months shown.

<sup>2</sup> Includes an average in March 1932 of \$2.73.

<sup>3</sup> Includes an average in February as follows: Chicago—1936, \$3.49; 1942, \$2.50. New York—1942, \$2.29.

Bureau of Agricultural Economics.

Compiled as follows: Chicago, from Chicago Fruit and Vegetable Reporter. New York, reports of California Fruit Growers Exchange. Prices weighted by number of boxes sold. These prices are a new series and are not comparable with those published in Yearbooks prior to 1930.

<sup>1</sup> Includes the following quantities unharvested on account of market conditions (1,000 tons): California—1922, 100; 1925, 138; 1926, 15; 1927, 142; 1928, 153; 1930, 433, including 316 sold but left on the vines; 1931, 10; 1932, 154; 1933, 3; other States, 1937, 10; 1940, 3. Price and value apply only to the harvested portion of the crop plus a quantity of fruit that was sold but left on the vines in 1930.

<sup>2</sup> Equivalent per unit returns for bulk fruit at the first delivery point.

<sup>3</sup> Total exports (domestic plus foreign) minus total imports. Beginning 1933-34, domestic exports minus imports for consumption.

<sup>4</sup> Included in total production of grapes, fresh basis; 1 ton of dried raisins equivalent to about 4 tons of fresh grapes.

<sup>5</sup> Exports and imports of raisins converted to sweat-box, or production, basis at the ratio of 1 to 1.08.

<sup>6</sup> Net imports equal total imports minus total exports (domestic plus foreign).

<sup>7</sup> January-June 1922; reported in value only prior to this date.

<sup>8</sup> Beginning 1933-34, imports for consumption.

<sup>9</sup> Preliminary.

Agricultural Marketing Service and Bureau of Agricultural Economics. Foreign trade compiled from Monthly Summary of Foreign Commerce of the United States, June issues, 1920-26; January and June issues, 1927-40, and official records of the Bureau of Foreign and Domestic Commerce.

TABLE 309.—*Grapes: Production (average 1930-39) and season average price per ton received by farmers, by States, annual 1939-41*

<sup>1</sup> For some States in certain years, production includes some quantities unharvested on account of market conditions. In 1940, estimates of such quantities were as follows (tons): New York, 3,000. Prices apply only to the harvested portion of the crop.

<sup>2</sup> Preliminary.

<sup>3</sup> Equivalent per unit returns for bulk fruit at the first delivery point.

<sup>4</sup> Dried basis: 1 ton of dried raisins equivalent to about 4 tons of fresh grapes.

Agricultural Marketing Service.

<sup>1</sup> Includes small quantities of dried grapes which were finally used for juice. 1 ton dried is equal to 4 tons fresh.

<sup>2</sup> Estimates made by the Giannini Foundation of Agricultural Economics, University of California, and based upon reports of the California Cooperative Crop Reporting Service and of the Federal-State market news service.

Bureau of Agricultural Economics. Compiled from reports of the California Cooperative Crop Reporting Service, except as otherwise designated.

<sup>1</sup> Preliminary.

<sup>2</sup> Chiefly New York, Pennsylvania, Michigan, and Iowa.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales but are useful principally in indicating the time of movement and the relative movement by months. A carload averages about 1,000 lug boxes of western grapes or 1,200 12-quart baskets of eastern grapes.

TABLE 312.—*Grapes: Number of packages of selected California varieties sold and weighted season average price,<sup>1</sup> auction sales in 12 markets,<sup>2</sup> 1936-41*

<sup>1</sup> According to the 1930 census there is some commercial production of olives in Arizona and a few minor States, but 99 percent of the 1929 production was in California.

<sup>2</sup> Includes the following quantities unharvested on account of market conditions (tons): 1932, 5,200; 1938, 1,500. Price and value apply only to the harvested portion of the crop.

<sup>3</sup> Reported in value only.

<sup>4</sup> Preliminary.

Agricultural Marketing Service and Bureau of Agricultural Economics. Figures on California pack compiled from trade reports. Canned olives expressed in standard buffet cases. Imports compiled from reports of Department of Commerce. A gallon of olive oil weighs approximately 7.5 pounds net. About 40 gallons of oil are obtained from 1 ton of olives in California.

TABLE 315.—*Peaches: Production, value, and domestic exports, United States, 1909-41*

<sup>1</sup> Includes the following quantities unharvested on account of market conditions and/or diverted from marketing channels in accordance with provisions of marketing agreements and because of poor quality (1,000 bushels): 1926, 1,400; 1927, 2,709; 1928, 3,957; 1930, 10,430, including 6,180 sold but left on the trees; 1931, 8,478, including 3,938 sold but left on the trees; 1932, 7,709; 1933, 3,571, including 1,404 sold but left on the trees; 1934, 2,417; 1938, 1,126; 1939, 1,044; 1940, 741; 1941, 1,322. Price and value apply only to the harvested portion of the crop, plus a quantity of fruit that was sold but left on the trees in 1930, 1931, and 1933.

<sup>2</sup> Prior to 1925 prices are as of Sept. 15.

<sup>3</sup> Compiled from Foreign Commerce and Navigation of the United States, 1909-18, and Monthly Summary of Foreign Commerce of the United States, June issues, 1919-26, January and June issues, 1927 to date.

<sup>4</sup> Net processed weight.

<sup>5</sup> Canned peaches were reported in value only prior to July 1, 1922.

<sup>6</sup> Dried peaches are 21 percent of total dried fruit for salad.

<sup>7</sup> Exports of dried fruit converted to unprocessed dry weight by dividing by 1.07. Unprocessed dry weight converted to terms of fresh fruit on the basis that 1 pound dried equals 5.5 pounds fresh. Canned peaches converted to terms of fresh on basis that 1 pound canned equals about 1 pound fresh. 43 pounds of fresh equal 1 bushel.

<sup>8</sup> January to June; not separately reported prior to this time.

<sup>9</sup> Preliminary.

Agricultural Marketing Service and Bureau of Agricultural Economics. *Italic figures are census returns.* Production of dried peaches as reported by California Cooperative Crop Reporting Service. Production of canned peaches as reported by Giannini Foundation, Berkeley, Calif., plus estimates for States other than California.

TABLE 316.—*Peaches: Production (average 1930-39) and season average price per bushel received by farmers, by States, annual 1940 and 1941*

| State and<br>division | Production <sup>1</sup>     |              |                   | Price for<br>crop of— |       | State and<br>division         | Production <sup>1</sup>     |              |                   | Price for<br>crop of— |      |

<sup>1</sup> For some States in certain years, production includes some quantities unharvested on account of market conditions. In 1940 and 1941, estimates of such quantities were as follows (1,000 bushels): 1940—California Clingstone, 625; 1941—North Carolina, 166; South Carolina, 600; Georgia, 559. Prices apply only to the harvested portion of the crop. <sup>2</sup> Preliminary.

<sup>3</sup> Includes 56,000 bushels harvested but not utilized due to excessive cullage resulting from rain damage at harvest time.

<sup>4</sup> Includes 60,000 bushels diverted from marketing channels in accordance with provisions of marketing agreement. <sup>5</sup> Mainly for canning.

Agricultural Marketing Service.

<sup>1</sup> Preliminary.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales, but are useful principally in indicating the time of movement and the relative movement by months. A carlot averages about 400 bushels.

<sup>1</sup> Beginning January 1942, figures are preliminary.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales, but are useful principally in indicating the time of movement and the relative movement by months.

<sup>1</sup> Includes the following quantities unharvested on account of market conditions and/or diverted from marketing channels in accordance with provisions of marketing agreements (1,000 bushels): 1927, 83; 1928, 83; 1930, 1,292; 1931, 625; 1932, 3,617; 1933, 2,447; 1934, 375; 1937, 967; 1938, 2,841; 1939, 1,292; 1940, 1,241. Price and value apply only to the harvested portion of the crop.

<sup>2</sup> Prior to 1925 prices are as of November 15.

<sup>3</sup> Canned pears converted to terms of fresh on the basis that canned fruit is equivalent to about 85.5 percent of fresh; dried pears converted to terms of fresh on the basis that 1 pound dried equals about 5.5 pounds fresh; 50 pounds fresh equals 1 bushel, except in California, where 48 pounds equals 1 bushel. No imports of pears reported. Compiled from Monthly Summary of Foreign Commerce of the United States, June issues, 1923-26, January and June issues, 1927-40.

<sup>4</sup> Fresh and canned pears were reported in value only prior to July 1, 1922.

<sup>5</sup> Dried pears are 16½ percent of total dried fruit for salad.

<sup>6</sup> January-June 1929; dried pears not separately reported prior to this date.

<sup>7</sup> January-June 1930; not separately reported prior to this date.

<sup>8</sup> Preliminary.

Agricultural Marketing Service and Bureau of Agricultural Economics. *Italic figures are census returns.*

<sup>1</sup> For some States in certain years, production includes some quantities unharvested on account of market conditions. In 1940, estimates of such quantities were as follows (1,000 bushels): Ohio, 25; Washington Bartlett, 154; other, 345; California Bartlett, 208; other, 167. Prices apply only to the harvested portion of the crop.

<sup>2</sup> Preliminary.

<sup>3</sup> Includes the following quantities harvested but not utilized in accordance with grade and size requirements of marketing agreements (1,000 bushels): Washington other, 262; Oregon other, 80.

<sup>4</sup> Equivalent per unit returns for bulk fruit at the first delivery point.

Agricultural Marketing Service.

TABLE 322.—*Pears: Production in specified countries, averages 1926-27 to 1930-31 and 1931-32 to 1935-36, annual 1936-37 to 1941-42*

<sup>1</sup> Preliminary.    <sup>2</sup> 4-year average.    <sup>3</sup> 1 year only.    <sup>4</sup> Table pears only.    <sup>5</sup> "Perry" pears only.  
<sup>6</sup> 3 years only.    <sup>7</sup> 2 years only.

Office of Foreign Agricultural Relations.

Compiled from official and consular sources, except where otherwise noted. Marketing year beginning July 1. The year 1936-37, for example, refers to the crop harvested beginning July 1, 1936, in Northern Hemisphere countries and in the spring of 1937 in Southern Hemisphere countries. Data for most countries are estimates of commercial production.

<sup>1</sup> For some States in certain years, production includes some quantities unharvested on account of market conditions. In 1940 and 1941, estimates of such quantities were as follows (tons): 1940—plums, California, 5,000; prunes, western Oregon, 6,200; California, 22,500; 1941—plums, California, 5,000; prunes, eastern Washington, 2,600; western Washington, 3,800; eastern Oregon, 500; western Oregon, 26,400; California, 27,500. Prices apply only to the harvested portion of the crop.

<sup>2</sup> Preliminary.

<sup>3</sup> Equivalent per unit packing-house-door returns.

<sup>4</sup> Includes 400 tons harvested in eastern Oregon, but not utilized, in accordance with provisions of marketing agreement.

Agricultural Marketing Service.

<sup>1</sup> These estimates include quantities sold and those used on the farm for household consumption.

<sup>2</sup> Preliminary.

<sup>3</sup> Includes small quantities of prunes canned and dried.

<sup>4</sup> Equivalent per unit packing-house-door returns.

<sup>5</sup> Includes small quantities for cold packing.

<sup>6</sup> The drying ratio in Washington and Oregon ranges from 3 to 4 pounds of fresh fruit to 1 pound dried; in California, the drying ratio is approximately 2½ pounds fresh to 1 pound dried.

<sup>7</sup> In some years, in addition to the dried prunes produced in California, additional quantities of prunes remained unharvested on account of market conditions. In 1940 the equivalent of 9,000 tons of dried prunes was not harvested on account of market conditions; in 1941 the equivalent of 11,000 tons was not harvested.

Agricultural Marketing Service.

<sup>1</sup> Idaho, Washington, and Oregon.<sup>2</sup> Includes small quantities for cold packing.<sup>3</sup> Washington and Oregon.<sup>4</sup> The drying ratio in Washington and Oregon ranges from 3 to 4 pounds of fresh fruit to 1 pound dried; in California, the drying ratio is approximately 2½ pounds fresh to 1 pound dried.<sup>5</sup> Washington, Oregon, and California.<sup>6</sup> Idaho, Washington, Oregon, and California.<sup>7</sup> Includes the following quantities unharvested on account of market conditions and/or diverted from marketing channels in accordance with provisions of marketing agreement.

Agricultural Marketing Service and Bureau of Agricultural Economics. Export data compiled from records of Department of Commerce.

months (tons): 1924, 2,000; 1926, 1,000; 1929, 3,000; 1930, 56,900; 1931, 5,000; 1932, 28,100; 1933, 8,300; 1934, 10,500; 1935, 8,000; 1937, 4,700; 1938, 186,500; 1939, 25,900; 1940, 29,100; 1941, 60,300. Price and value apply only to the harvested portion of the crop.

<sup>8</sup> Exports of dried prunes converted to unprocessed dry weight by dividing by 1.025. Unprocessed dry weight converted to terms of fresh fruit on the basis that 1 pound dried equals 2½ pounds fresh. Canned prunes converted to terms of fresh fruit on the basis that 1 pound canned equals 0.704 pound fresh.

<sup>9</sup> Dried prunes in salad estimated at 43 percent of total dried fruit for salad.<sup>10</sup> January to June; not segregated prior to this time.<sup>11</sup> Preliminary.

Bureau of Agricultural Economics.

Compiled from reports of Agricultural Marketing Service received daily through their representatives in the markets.

Average prices as shown are based on stock of good merchantable quality and condition in less than carlot quantities; they are simple average of daily range of selling prices. In some cases conversions have been made from larger to smaller units or vice versa in order to obtain comparability.

TABLE 332.—*Strawberries, commercial crop: Acreage, production, and season average price per crate received by farmers, average 1930-39, annual 1940 and 1941*<sup>1</sup>

<sup>1</sup> Preliminary.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales but are useful principally in indicating the time of movement and the relative movement by months. A carload contains about 12½ tons.

<sup>1</sup> Combined estimates for market and for sauerkraut are given in this portion of the table.<sup>2</sup> Fall-crop States supply earliest new-crop movement, starting in fall preceding year shown.<sup>3</sup> Short-time average.<sup>4</sup> Includes some quantities not marketed: Mississippi, 5,000 tons in 1941.<sup>5</sup> Sections 1 and 2 refer to chronological movement of the crop to market.<sup>6</sup> Average price of late Danish crop is computed only to Dec. 1.<sup>7</sup> All of these figures are included in the upper portion of this table, but are segregated here for convenient reference.<sup>8</sup> "Other States" includes Iowa, Maryland, New Jersey, North Carolina, Oregon, Pennsylvania, Tennessee, Texas, Utah, and Virginia.

Agricultural Marketing Service. Estimates based on returns from crop reporters and sauerkraut manufacturers.

<sup>1</sup> Includes Honey Ball, Honey Dew, Casaba, and Persian melons not separately reported.

<sup>2</sup> Includes some quantities not marketed, and excluded in computing farm value: 433,000 crates in 1931, 3,102,000 in 1932, 863,000 in 1933, 350,000 in 1935, 410,000 in 1936, 2,164,000 in 1938, 115,000 in 1940, and 200,000 in 1941.

<sup>3</sup> In terms of standard crates (45's) containing approximately 60 pounds. Most shipments of cantaloups originating in the western States are in jumbo crates.

Agricultural Marketing Service.

<sup>1</sup> Preliminary.

<sup>2</sup> Includes Casaba, Honey Ball, Honey Dew, Persian, and mixed melons. Cars of mixed melons may include cantaloups as well as other muskmelons.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales but are useful principally in indicating the time of movement and the relative movement by months. A carload averages about 340 standard crates.

<sup>1</sup> Preliminary.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales but are useful principally in indicating the time of movement and the relative movement by months. Data include carrots shipped either with tops or without tops. A carload of carrots with tops usually contains about 350 Los Angeles crates, and a carload of carrots without tops about 500 bushels.

<sup>1</sup> Preliminary.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales but are useful principally in indicating the time of movement and the relative movement by months. A carload of celery usually contains about 350 half-crates.

<sup>1</sup> In terms of cases of 24 No. 2 cans.

Agricultural Marketing Service. The only State for which the Service obtains data regarding sweet corn for shipment direct to market is New Jersey. For the last 5 years (1937-41), the acreage of New Jersey sweet corn for market averaged about 23,780 acres, with yield of about 5,000 ears per acre and average production of approximately 119,000,000 ears per year. The price to farmers averaged \$12.50 per 1,000 ears, and the total farm value of this crop in New Jersey was about \$1,543,000 per year.

<sup>1</sup> Includes some quantities not marketed and excluded in computing farm value: 1,551,000 bushels in 1930, 234,000 in 1931, 263,000 in 1932, 227,000 in 1935, 8,000 in 1938, 100,000 in 1939, and 96,000 in 1941.

<sup>2</sup> Stocks on hand include both salt and dill pickles in tanks and barrels, sold and unsold, on Oct. 1.

<sup>3</sup> Bushels containing approximately 48 pounds.

Agricultural Marketing Service.

<sup>1</sup> Preliminary.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales but are useful principally in indicating the time of movement and the relative movement by months. A carload averages about 300 crates from the western producing areas or 600 (eastern) crates from eastern producing States. Fully 95 percent of the rail and boat shipments of lettuce are from western States.

<sup>1</sup> Includes some quantities not marketed and excluded in computing farm value: 88,000 sacks in 1928, 83,000 in 1929, 43,000 in 1930, 363,000 in 1931, 602,000 in 1932, 186,000 in 1934, 314,000 in 1935, 924,000 in 1936, 140,000 in 1937, 634,000 in 1938, 315,000 in 1939, and 180,000 in 1940.

<sup>2</sup> Reported in bushels or pounds; converted to sacks at ratio of 57 pounds per bushel and 100 pounds per sack.

<sup>3</sup> Sacks containing 100 pounds. Most sales in terminal markets are in sacks of 50 pounds.

Agricultural Marketing Service and Bureau of Agricultural Economics.

<sup>1</sup> Preliminary.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales but are useful principally in indicating the time of movement and the relative movement by months. A carload averages about 550 sacks of 50 pounds each.

<sup>1</sup> No quotations for U. S. No. 1 grade; prices shown are for U. S. Commercial grade, which is not comparable with U. S. No. 1.<sup>2</sup> Carlot sales.<sup>3</sup> Less than 10 quotations.

Bureau of Agricultural Economics. Compiled from reports of Agricultural Marketing Service received daily through their representatives in the markets.

Average prices as shown are based on stock of U. S. No. 1 grade, except as otherwise stated; they are simple averages of daily range of selling prices in less-than-carlot quantities. In some cases conversions have been made from larger to smaller units in order to obtain comparability.

<sup>1</sup> Includes some quantities not marketed and excluded in computing farm value: 117,000 bushels in 1932, 210,000 in 1933, 106,000 in 1935, 35,000 in 1939, and 75,000 in 1940.

<sup>2</sup> Bushels containing approximately 30 pounds, unshelled.

<sup>3</sup> Reported on shelled basis.

<sup>4</sup> In terms of cases of 24 No. 2 cans.

Agricultural Marketing Service and Bureau of Agricultural Economics. Data on foreign trade from Department of Commerce reports.

TABLE 376.—*Peas, green, commercial crop: Acreage, production, and season average price per bushel and per ton received by farmers, average 1930-39, and annual 1940 and 1941*

<sup>1</sup> Merchantable potatoes held by growers and local dealers and buyers in the 37 late and intermediate States. (Jan. 1 stocks held by growers and local dealers and buyers in early potato States usually are negligible.) Includes potatoes sold to starch factories after January 1.

<sup>2</sup> Excludes 7,462,000 bushels in 1928 and 1,689,000 bushels in 1932, not harvested on account of market conditions, in which years total production was 427,249,000 bushels and 376,425,000 bushels, respectively.

<sup>3</sup> Included under sales are diverted potatoes grading U. S. No. 2 or better under the Government diversion programs as follows: 1937—in Maine, 2,379,000 bushels diverted to starch factories; in other States, 6,372,000 bushels diverted to livestock feed; 1940—5,263,000 bushels diverted to livestock feed.

<sup>4</sup> Preliminary.

Agricultural Marketing Service.

TABLE 383.—Potatoes: Acreage, production, value, and foreign trade, United States, 1899-1941

<sup>1</sup> Prior to 1908 prices are as of Dec. 1.<sup>2</sup> Compiled from Producers Price Current. Prices 1899-1919 are averages of the high and low weekly quotations of New York potatoes, October-June, converted from dollars per 180 pounds to cents per bushel; beginning 1920 prices of eastern potatoes weighted by unloads, season September-May, from records of Agricultural Marketing Service.<sup>3</sup> Compiled from Commerce and Navigation of the United States, 1899-1917; Foreign Commerce and Navigation of the United States, 1918; Monthly Summary of Foreign Commerce of the United States, June issues, 1919-26, January and June issues, 1927 to date, and official records of the Bureau of Foreign and Domestic Commerce.<sup>4</sup> The difference between total exports (domestic exports plus reexports) and total imports; beginning 1933 domestic exports minus imports for consumption. + indicates net exports and - indicates net imports.<sup>5</sup> Includes 7,462,000 bushels in 1928 and 1,689,000 bushels in 1932 not harvested on account of market conditions. Price and value apply only to the harvested portion of the crop.<sup>6</sup> Beginning 1933 imports for consumption.<sup>7</sup> Preliminary.

Agricultural Marketing Service and Bureau of Agricultural Economics. Italic figures are census returns. For earlier years, see Agricultural Statistics, 1941, table 335.

<sup>1</sup> Except for California, the estimates shown for each State under a particular group cover the entire crop, whether commercial or noncommercial, early or late.

<sup>2</sup> Preliminary.

<sup>3</sup> Estimates shown for California under the early States cover the early commercial crop only.

<sup>4</sup> Estimates shown for California under the surplus late States do not include the early commercial crop.

Agricultural Marketing Service.

<sup>1</sup> These data are included in table 383 on total potatoes.

<sup>2</sup> Includes some quantities not marketed and excluded in computing farm value: 71,000 bushels in 1937, and 1,240,000 in 1939.

<sup>3</sup> Bushels containing approximately 60 pounds.

Agricultural Marketing Service.

<sup>1</sup> Preliminary.

<sup>2</sup> Netted Gem and Russet Burbank are the same variety. <sup>3</sup> Also called White Rural or Smooth Rural.

<sup>4</sup> Some of the production prior to 1936 may be included under "Other varieties."

<sup>5</sup> 6-year average. <sup>6</sup> 5-year average.

Agricultural Marketing Service. See table 388 for data on a State basis. Information concerning the States which are the largest producers of each variety can be obtained from the Agricultural Marketing Service on request.

TABLE 388.—Potatoes: Production of certified seed, by States, and imports, average 1930-39, annual 32-41

<sup>1</sup> Preliminary.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales but are useful principally in indicating the time of movement and the relative movement by months. A carload usually ranges from 300 to 360 sacks of 100 pounds. Data for earlier years in 1928 Yearbook, table 208, and 1933 Yearbook, table 229.

<sup>1</sup> Less than 10 quotations.<sup>2</sup> Street sales.<sup>3</sup> Less-than-carlot sales.

Bureau of Agricultural Economics. Compiled from records of Agricultural Marketing Service received daily from their representatives in the markets. Prices are simple averages of daily range of selling prices, based on stock of U. S. No. 1 grade. In some cases conversions were made from larger to smaller units, or vice versa, in order to obtain comparability. Prices exclude western potatoes and a few others for which the quotations fall outside the usual range.

<sup>1</sup> Includes undetermined quantities used for processing in some of the minor States.

<sup>2</sup> Bushels containing approximately 18 pounds.

<sup>3</sup> Fall crop in Virginia supplies earliest new-crop movement, starting in fall preceding year shown.

<sup>4</sup> Short-time average.

<sup>5</sup> Includes some quantities not marketed: Colorado, 33,000 bushels in 1940.

<sup>6</sup> "Other States" includes Arkansas and Oklahoma.

Agricultural Marketing Service; estimates based on returns from crop reporters and processing establishments.

<sup>1</sup> Preliminary.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales but are useful principally in indicating the time of movement and the relative movement by months. A carload usually contains about 500 bushels.

<sup>1</sup> Includes some quantities not marketed and excluded in computing farm value: 168,000 bushels in 1931, 50,000 in 1932, 134,000 in 1933, 830,000 in 1934, 195,000 in 1938, 78,000 in 1940, and 33,000 in 1941.

<sup>2</sup> Includes "otherwise prepared," if any.

<sup>3</sup> Bushels containing approximately 53 pounds.

<sup>4</sup> In terms of cases of 24 No. 2 cans.

<sup>5</sup> Beginning Sept. 22, 1922.

<sup>6</sup> Reported in value only, prior to this date.

<sup>7</sup> Jan. 1-June 30; not separately classified prior to this date.

<sup>8</sup> Imports for consumption beginning 1933.

<sup>9</sup> Preliminary.

Agricultural Marketing Service and Bureau of Agricultural Economics. Acreage, production, and value figures based on returns from crop reporters and processing establishments; imports and exports compiled from Monthly Summary of Foreign Commerce of the United States, June issues, and official records of the Bureau of Foreign and Domestic Commerce.

TABLE 404.—*Tomatoes, commercial crop: Acreage, production, and season average price per bushel and per ton received by farmers, average 1930-39, annual 1940 and 1941*

<sup>1</sup> Preliminary.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales but are useful principally in indicating the time of movement and the relative movement by months. A carload averages about 650 lug boxes.

<sup>1</sup> Preliminary.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales but are useful principally in indicating the time of movement and the relative movement by months. A carload contains about 1,000 medium-sized melons.

<sup>1</sup> Illinois, Missouri, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, and Texas.

<sup>2</sup> 1922, Nov. 1 price; 1923-36, Dec. 1 price.

<sup>3</sup> On basis of in the shell; shelled nuts converted to unshelled at ratio of 1 to 2.5.

<sup>4</sup> Value of all varieties differs slightly from sum of improved and seedling varieties because of rounding of prices of all varieties.

<sup>5</sup> Preliminary.

Agricultural Marketing Service and Bureau of Agricultural Economics. Foreign trade data from Department of Commerce reports.

TABLE 413.—Pecans: Production (average 1930-39) and season average price per pound received by farmers, by States, annual 1940 and 1941

<sup>1</sup> Preliminary.

<sup>2</sup> The reported truck receipts as here shown are estimated to represent approximately the following percentages of total truck receipts in these cities: Atlanta and Philadelphia 95 percent; Boston, Kansas City, and San Francisco, each 90 percent; Chicago, Los Angeles, and New York, each 85 percent. Truck receipt report for Philadelphia

not available for 1935. Adequate reports of truck receipts for Chicago not available prior to 1940. Rail unloads in this table include both carlot and less-than-carlot quantities.

<sup>3</sup> Includes Casaba, Honey Ball, Honey Dew, Persian, and mixed melons.  
Agricultural Marketing Service.

TABLE 419.—*Fruits and vegetables, fresh: United States carlot shipments of 40 specified commodities, 1941,<sup>1</sup> and totals, average 1930-39, annual 1932-41*

<sup>1</sup> Preliminary.<sup>2</sup> Includes snap beans, lima beans, and fava beans.<sup>3</sup> Includes dewberries and loganberries.<sup>4</sup> Includes Casaba, Honey Ball, Honey Dew, Persian, and mixed melons.<sup>5</sup> Greens include leafy vegetables other than broccoli and spinach (shown separately), which are ordinarily prepared by cooking, such as kale, turnip tops, collards, Seven Top turnips, mustard greens, beet greens, dandelion greens, and Swiss chard.<sup>6</sup> Includes romaine.<sup>7</sup> Includes satsumas and tangerines.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Shipments by truck are not included but have become increasingly important during this period. The decrease in annual totals of approximately 7 percent since 1932 may be accounted for chiefly by the shift to motortruck transportation.

Monthly carlot shipments for the last 10 years of important individual commodities will be found under the statistics relating to apples, cabbage, cantaloups, carrots, celery, citrus fruits, grapes, lettuce, onions, peaches, pears, potatoes, sweetpotatoes, tomatoes, and watermelons.

<sup>1</sup> A large part of the shipping-point inspections was under cooperative agreements between the Federal and State governments. Receiving-market inspections were under the Federal Service. Some of the shipments inspected at receiving markets had been inspected previously at shipping points.

Shipping-point inspections were mostly for grade, as defined in the Federal standards. A considerable part of the receiving-market inspections was for condition only. Inspections were requested and paid by the shippers and other financially interested parties and were optional with the applicants except when required by State laws or marketing agreements. In addition to the quantities shown there were some inspections of products for canning factories and some for institutions.

The figures, particularly in the recent years, include some motortruck or less-than-carlot shipment inspections, which have been converted to a carlot basis. For the year beginning July 1940, shipping-point inspections were reported from 45 States and receiving-market inspections in 46 cities.

Agricultural Marketing Service.

<sup>1</sup> Excludes canned fruits, dried fruits, and melons. In terms of estimated weight available for sale in retail markets.<sup>2</sup> Crop-year basis except pineapples, which are on a calendar year following the crop year.<sup>3</sup> Includes grapes for wine.

Bureau of Agricultural Economics.

Total annual consumption, excluding quantities used for canning and drying, calculated from production, imports, exports, and shipments to and from insular areas. Apples and pears are also adjusted for changes in stocks. Production and stocks estimates based on those reported by the Agricultural Marketing Service. Exports, imports, and shipments are taken from the Monthly Summary of Foreign Commerce and from Foreign Commerce and Navigation of the United States. Per capita consumption based on total population.

<sup>1</sup> In terms of canned weight.<sup>2</sup> Canning-year basis, usually beginning about July 1, except for olives, for which the pack year begins in December.

Bureau of Agricultural Economics.

Total annual consumption calculated primarily from canned pack, exports, imports, and shipments to the insular areas. Apricots, cherries, olives, peaches, and pears are also adjusted for changes in stocks. Pack and stocks figures based on data from National Canners Association, Western Canner and Packer, Giannini Foundation, and Census of Manufactures. Exports, imports, and shipments are taken from Monthly Summary of Foreign Commerce of the United States. Per capita consumption calculated on the basis of total population.

<sup>1</sup> In terms of dried weight.<sup>2</sup> Crop-year basis beginning about July 1, except for prunes and raisins, for which the crop year begins about September 1.

Bureau of Agricultural Economics.

Total annual consumption calculated primarily from production, stocks, exports, imports, and shipments to the insular areas. Prunes and raisins are also adjusted for changes in stocks, and the estimates for currants represent net imports only. Prunes include quantities for non-food uses in later years. Production and stocks are taken from the Agricultural Marketing Service, Western Canner and Packer, and Giannini Foundation; exports, imports, and shipments from Monthly Summary of Foreign Commerce of the United States. Per capita consumption calculated on the basis of total population.

<sup>1</sup> In terms of estimated weight available for sale in retail markets.<sup>2</sup> Onions, potatoes, and sweetpotatoes are on a crop-year basis; all others on a calendar year following the crop year.<sup>3</sup> Artichokes, lima beans, cucumbers, eggplant, kale, peppers, and pimientos.

Bureau of Agricultural Economics.

Total annual consumption is calculated from production adjusted for exports, imports, and shipments to insular areas, where they are significant. Production includes commercial production as reported by the Agricultural Marketing Service, plus estimates for market and city gardens. Exports, imports, and shipments are taken from the Monthly Summary of Foreign Commerce of the United States. Per capita consumption calculated on the basis of urban population except potatoes, sweetpotatoes, and onions, for which total population figures were used.

<sup>1</sup> In terms of canned weight.<sup>2</sup> Canning-year basis, approximately as follows: Asparagus and spinach, beginning Mar. 1; peas, May 1; beans, corn, tomatoes, beets, Aug. 1; pumpkin and squash, Oct. 1.

Bureau of Agricultural Economics.

Total annual consumption calculated from canned pack, stocks, exports, imports, and shipments to the insular areas, except for pumpkin and squash, beets, and tomato pulp, for which only pack figures are available. Pack and stocks figures based on data from National Canners Association, Western Canner and Packer, Giannini Foundation, and Census of Manufactures. Exports, imports, and shipments are taken from the Monthly Summary of Foreign Commerce of the United States. Per capita consumption calculated on the basis of total population.

# STATISTICS OF HAY, SEEDS, AND MINOR FIELD CROPS

TABLE 428.—Hay: Acreage, yield, production, Dec. 1 price per ton received by farmers, and foreign trade, United States, 1899–1941

| Year                    | Tame hay           |                |                   |                | Wild hay           |                |                   |                | All hay   |                   |

<sup>1</sup> For "All Hay," monthly prices, by States, weighted by production to obtain monthly price for the United States. Season average prices for each State based on monthly prices weighted by estimates of monthly sales during the crop marketing season. Season average prices, by States, weighted by production to obtain United States average.

<sup>2</sup> Clover hay prices July 15, 1930, to Feb. 15, 1932.

Agricultural Marketing Service. Based on returns from special price reporters. Monthly prices, by States, weighted by production to obtain monthly price for the United States; season average price obtained by weighing United States monthly prices by monthly marketings. Data for earlier years for All Hay, Alfalfa, Clover, and Prairie, in December 1935 issue of Crops and Markets, p. 532.

<sup>1</sup> Table includes, besides the ordinary edible beans, the blackeye of California and beans grown for seed. Soybeans not included.

<sup>2</sup> Price of cleaned beans.

<sup>3</sup> Farm value of dry edible beans equals the price of cleaned beans applied to the production of cleaned beans rather than total production.

<sup>4</sup> Compiled from New York Producers' Price Current. Average of daily quotations.

<sup>5</sup> Imports and exports compiled from Monthly Summary of Foreign Commerce of the United States, 1909–41, and official records of the Bureau of Foreign and Domestic Commerce.

<sup>6</sup> Bags of 100 pounds.

<sup>7</sup> Includes dried peas.

<sup>8</sup> Includes lentils.

<sup>9</sup> Acreage grown alone.

<sup>10</sup> Imports for consumption, beginning 1933.

<sup>11</sup> Preliminary.

Agricultural Marketing Service and Bureau of Agricultural Economics.

Italic figures are census returns; census figures include all States; other figures, principal producing States only.

TABLE 459.—*Beans, dry, edible: Acreage, yield, and production (average 1930-39), and season average price per bag of 100 pounds received by farmers, by States, annual 1940 and 1941*<sup>1</sup>

<sup>1</sup> Excluding soybeans, mung, adzuki, broad bean, horse beans, and similar classes not commonly used as edible beans in the United States.

<sup>2</sup> Preliminary.

<sup>3</sup> 3-year average, 1927-29.

<sup>4</sup> Includes Austria, Sudetenland, and Memel.

<sup>5</sup> Production in Hokkaido Province, where most of the dry edible bean varieties are grown.

<sup>6</sup> Unofficial estimate.

<sup>7</sup> Lima beans.

Bureau of Agricultural Economics. Compiled from official sources and International Institute of Agriculture, except as otherwise stated. Figures are for the harvesting seasons 1925-41 in the Northern Hemisphere and 1926-42 in the Southern Hemisphere.

<sup>1</sup> Preliminary.

<sup>2</sup> Includes peas.

<sup>3</sup> Seaborne trade only.

<sup>4</sup> Beginning April 1937, foreign trade of Burma not included.

<sup>5</sup> January only, last published data.

<sup>6</sup> Prior to April 1937, foreign trade included with British India.

<sup>7</sup> Includes broad beans.

<sup>8</sup> Includes trade with Egypt.

<sup>9</sup> January-July, last published data.

<sup>10</sup> January-April, last published data.

<sup>11</sup> Beginning April 1938, trade between Germany and Austria no longer reported as foreign trade in the German statistics. The same applies to trade between Germany and Sudetenland for the period October-December 1938.

<sup>12</sup> Java and Madura only.

<sup>13</sup> January-June, last published data.

<sup>14</sup> Includes peas and lentils.

<sup>15</sup> Includes foreign trade of Alaska, Virgin Islands of the United States from 1935, and Puerto Rico. Does not include foreign trade of Hawaii.

Bureau of Agricultural Economics. Compiled from the International Yearbook of Agricultural Statistics, and official sources.

<sup>1</sup> Preliminary.<sup>2</sup> For some States in certain years, production includes some quantities not available for marketing because of economic conditions and the marketing agreement allotments. In 1940 and 1941, estimates of such quantities were as follows (1,000 pounds): 1940—Washington, 1,410; Oregon, 2,441; California, 1,215; 1941—California, 110. Prices apply only to the part of the crop which was sold.<sup>3</sup> Excludes approximately 400 acres not harvested because of rain and wind damage.

<sup>1</sup> Includes the following quantities not available for marketing because of economic conditions and the marketing agreement allotments (1,000 pounds): 1934, 802; 1935, 5,436; 1937, 4,365; 1938, 5,625; 1939, 6,390; 1940, 5,066; 1941, 110. Prices apply only to the part of the crop which was sold.

<sup>2</sup> From 1915 to 1931, Dec. 1 price.

<sup>3</sup> Compiled from Monthly Summary of Foreign Commerce of the United States, 1910-40, and official records of the Bureau of Foreign and Domestic Commerce.

<sup>4</sup> Total exports (domestic plus foreign) minus total imports; beginning 1933 domestic exports minus imports for consumption.

<sup>5</sup> 1920 to 1931 represent hops used to make cereal beverages containing less than 0.5 percent of alcohol by volume; 1932 includes 867,057 pounds of hops used to make cereal beverages containing less than 0.5 percent of alcohol by weight; 1933 to date, used for fermented liquor. Records of the Bureau of Internal Revenue, 1910 to 1925, and 1933 to date; annual reports of the Commissioner of Prohibition, 1926 to 1929, and Commissioner of Industrial Alcohol, 1930 to 1932.

<sup>6</sup> Net imports. <sup>7</sup> Less than 500 pounds.

<sup>8</sup> Not including 57,936 pounds in 1924, 71,508 pounds in 1925, 960 pounds in 1926, and 6,294 pounds in 1927 used in the manufacture of distilled spirits.

<sup>9</sup> Includes hop extract and lupulin 1930-35.

<sup>10</sup> Beginning 1933 imports for consumption. <sup>11</sup> Hops, only, beginning January 1936. <sup>12</sup> Preliminary.

Agricultural Marketing Service and Bureau of Agricultural Economics.

TABLE 480.—*Hops: Acreage and production in specified countries, averages 1925-29 and 1930-34, annual 1939-41*

<sup>1</sup> Obtained by subtracting the estimates of milk cow on farms, shown in table 584, from the estimate of all cattle on farms, shown in this table.

<sup>2</sup> Italic figures are from the census. Census dates were June 1, 1900; Apr. 15, 1910; Jan. 1, 1920 and 1925; Apr. 1, 1930; Jan. 1, 1935; Apr. 1, 1940. 1900, 1910, 1930, and 1940 excludes spring-born calves.

Bureau of Animal Industry.

Footnotes for table 488.

<sup>1</sup> Average for 5-year period, if available; otherwise for any year or years within this period, except as otherwise stated.<sup>2</sup> Preliminary.<sup>3</sup> Census. The latest census in many countries was in 1930.<sup>4</sup> 1932 or 1933.<sup>5</sup> Estimate for 1930.<sup>6</sup> Unofficial.<sup>7</sup> 1934.<sup>8</sup> 1928 or 1929.<sup>9</sup> Estimates for December of preceding year.<sup>10</sup> 1935.<sup>11</sup> These totals include interpolations for a few countries not reporting each year and rough estimates for some others. The 1939 European total is estimated for approximately the same territory as formerly.<sup>12</sup> Buffaloes included.<sup>13</sup> 1931.<sup>14</sup> Average of estimate for 1934 and census of 1930.<sup>15</sup> Average of estimate for 1936 and census of 1930.<sup>16</sup> Includes Saar.<sup>17</sup> Bohemia-Moravia Protectorate and territory comprised within boundaries of Slovenia and sub-Carpathian Russia prior to Mar. 15, 1939.<sup>18</sup> Boundaries as of spring 1939, excluding sub-Carpathian Russia.<sup>19</sup> Includes sub-Carpathian Russia.<sup>20</sup> After territorial cessions.<sup>21</sup> March.<sup>22</sup> Includes Burma, where cattle and buffaloes number about 6,000,000.<sup>23</sup> Estimate for total China based on official returns in 1934 to 1938 for Provinces which supported over 70 percent of total in 1914. The number comprised in Turkestan, Manchuria, and Inner Mongolia is included with China in this table, as it is not accounted for elsewhere.<sup>24</sup> Comparable totals for 63 countries. This includes estimates for total European territory.

Office of Foreign Agricultural Relations. Compiled from reports of U. S. Government representatives abroad, original official sources, and the International Institute of Agriculture, unless otherwise stated. Owing to unsettled conditions in Europe, the estimates for 1939-1941 as reported by countries of Central Europe are not strictly comparable with earlier years, as indicated in footnotes.

TABLE 490.—Cattle and calves: Production, disposition, and income, by States, 1940 (preliminary)

| State and division      | Number                                     |        |   |                |        | Production * |           | Cash income from sales of cattle, calves, beef, and veal * | Gross income * | Value of cattle and calves slaughtered for home consumption | Cost of cattle shipped in for feeding and breeding * |

<sup>1</sup> Shipments include shipments to public stockyards, direct to packers, and to points outside the State but do not include intrastate or interfarm sales within a State. Local slaughter is estimated slaughter in retail and small wholesale establishments.

<sup>2</sup> Includes cattle shipped in from other States and from central markets, but excludes intrastate shipments.

<sup>3</sup> Adjustments were made for cattle shipped in and changes in inventory.

<sup>4</sup> No adjustments made for cost of cattle shipped in and changes in inventory values. Gross income is "Cash income from sales of cattle, calves, beef, and veal" plus "Value of cattle and calves slaughtered for home consumption."

<sup>5</sup> Includes Government purchases.

<sup>6</sup> Preliminary.

Agricultural Marketing Service.

#### Footnotes for Table 490:

<sup>1</sup> Shipments include shipments to public stockyards, direct to packers, and to points outside the State but do not include intrastate or interfarm sales within a State. Local slaughter is estimated slaughter in retail and small wholesale establishments.

<sup>2</sup> Includes cattle shipped in from other States and from central markets but excludes intrastate shipments.

<sup>3</sup> Adjustments were made for cattle shipped in and changes in inventory.

<sup>4</sup> No adjustments made for cost of cattle shipped in and changes in inventory values. Gross income is "Cash income from sales of cattle, calves, beef, and veal" plus "Value of cattle and calves slaughtered for home consumption."

<sup>1</sup> Preliminary.

Bureau of Agricultural Economics. Compiled in original currencies and units as follows: Argentina—Boletín Mensual de Estadística Agropecuaria, Buenos Aires, monthly. Averages of daily quotations. Prior to May 1934 description did not include the term "special." Canada—Monthly Bulletin of Agricultural Statistics, Ottawa, for monthly quotations (described only as monthly average prices); The Canada Year Book, Ottawa, for yearly quotations (described only as yearly average prices but apparently weighted).

Prices converted to dollars per 100 pounds at current monthly rates of exchange as reported by the Federal Reserve Board. (Canadian series converted at par prior to September 1931 and at official rate beginning Sept. 16, 1939.) Annual averages for Argentina have been computed from monthly prices, whereas those for Canada have been converted from Canadian currency at annual exchange rates.

<sup>1</sup> Preliminary.<sup>2</sup> Year ended June 30.<sup>3</sup> The import figures include canned beef and veal, as taken from reports of the Bureau of Animal Industry, through 1933.<sup>4</sup> International Yearbook of Agricultural Statistics.<sup>5</sup> January-April, last published data.<sup>6</sup> Beginning April 1938, trade between Germany and Austria no longer reported as foreign trade in the German statistics. The same applies to trade between Germany and Swedenland for the period October-December 1938.<sup>7</sup> January-March, last published data.<sup>8</sup> Includes only oleomargarine, tallow, and artificial butter; meat imports into Italy are not separated as to kinds, although a large quantity of unclassified fresh and frozen meat is undoubtedly beef.<sup>9</sup> April-December, the first data available since 1935.<sup>10</sup> January only, last published data.<sup>11</sup> January-June, last published data.<sup>12</sup> Average figures are general imports; beginning 1933 "special" trade used.<sup>13</sup> January-July, last published data.

Bureau of Agricultural Economics. Compiled from official sources except as otherwise stated. This table includes fresh, pickled or salted, and canned beef, tallow, oleo oil, oleo stock, oleostearine, and oleomargarine.

TABLE 507.—*Beef: Stocks in cold-storage warehouses and meat-packing establishments, United States, average 1930-39, annual 1932-42*

[In million pounds; i. e., 000,000 omitted]

| Total of countries reporting all periods to 1939 (40) <sup>23</sup>              |                           | 139,080              | 146,502              | 136,089            | 140,425      | 139,663            | 148,455      |                   |                   |

<sup>1</sup> Average for 5-year period, if available; otherwise for any year or years within that period, except as otherwise stated.

<sup>2</sup> Preliminary.

<sup>3</sup> Average of 1926 estimate for 96 percent of municipalities and the final figures of the 1930 census.

<sup>4</sup> Census figures. The latest census in many countries was in 1930.

<sup>5</sup> Estimate for 1930.

<sup>6</sup> Year 1934.

<sup>7</sup> 1935.

<sup>8</sup> These totals include interpolations for a few countries not reporting each year and rough estimates for some others. The 1939 European total is estimated for approximately the same territory as formerly.

<sup>9</sup> Year 1922.

<sup>10</sup> Year 1931.

<sup>11</sup> September 30.

<sup>12</sup> Estimates for December of preceding year.

<sup>13</sup> Census figures 1925.

<sup>14</sup> Average of 1936 and 1930 census figures.

<sup>15</sup> Includes Saar.

<sup>16</sup> Bohemia-Moravia Protectorate and territory comprised within boundaries of Slovenia and sub-Carpathian Russia prior to March 15, 1939.

<sup>17</sup> Boundaries as of spring 1939, excluding sub-Carpathina Russia.

<sup>18</sup> Includes sub-Carpathian Russia.

<sup>19</sup> After territorial cessions.

<sup>20</sup> Includes French Sudan.

<sup>21</sup> Estimate for total China based on official returns in 1934 to 1938 for Provinces which supported over 78 percent of total in 1914. The number comprised in Turkestan, Manchuria, and Inner Mongolia is included with China in this table, as it is not accounted for elsewhere.

<sup>22</sup> Year 1921.

<sup>23</sup> Comparable totals for 40 countries. This includes estimates for total European territory.

Office of Foreign Agricultural Relations. Compiled from official sources and the International Institute of Agriculture, unless otherwise stated. Owing to unsettled conditions in Europe, the estimates for 1939–1941 as reported by the countries of Central Europe are not strictly comparable with earlier years, as indicated in footnotes.

TABLE 513.—Hogs: Federal hog-cholera control work, 1919-41

<sup>1</sup> Shipments include shipments to public stockyards, direct to packers, and to points outside the State but do not include intrastate or interfarm sales within the State. Local slaughter is estimated slaughter in retail and small wholesale establishments.

<sup>2</sup> Includes hogs shipped in from other States and from central markets but excludes intrastate shipments.

<sup>3</sup> Adjustments were made for hogs shipped in and changes in inventory.

<sup>4</sup> No adjustments made for cost of hogs shipped in and changes in inventory values. Gross income is "Cash income from sales of hogs, pork, and lard" plus "Value of hogs slaughtered for home consumption."

<sup>5</sup> Includes Government purchases.

<sup>6</sup> Preliminary.

Agricultural Marketing Service.

TABLE 515.—Hogs: Production, disposition, and income, by States, 1940 (prelim.)

<sup>1</sup> Shipments include shipments to public stockyards, direct to packers, and to points outside the State but do not include intrastate or interfarm sales within the State. Local slaughter is estimated slaughter in retail and small wholesale establishments.

<sup>2</sup> Includes hogs shipped in from other States and from central markets but excludes intrastate shipments.

<sup>3</sup> Adjustments were made for hogs shipped in and changes in inventory.

<sup>4</sup> No adjustments made for cost of hogs shipped in and changes in inventory values. Gross income is "Cash income from sales of hogs, pork, and lard" plus "Value of hogs slaughtered for home consumption."

## 402 BEEF CATTLE, HOGS, SHEEP, HORSES, AND MULES, 1942
